

PAWEŁ KASPRZAK

TECHNOLOGY
INNOVATOR &
PROBLEM SOLVER

PROFESSIONAL SUMMARY

Hello, I'm Paweł, a 23-year-old Computer Science student with a deep passion for technology, astrophysics, and problem-solving through programming and database management. I bring a diverse background from unmanned vessel instruction to real estate tech, with a keen focus on customer-centric UX/UI improvements. Committed to continuous learning, I'm self-taught in many areas, supplementing my university studies with online courses and hands-on project experience. My goal is to blend technical expertise with empathy, aiming to create human-centric, innovative solutions in the fields of machine learning and artificial intelligence

TECHNICAL PROFICIENCIES

Development Environments:

- Regular use of Visual Studio Code for coding exercises and project work.
- Practical experience with Git for version control and collaboration via GitHub.

Programming Languages:

- Working knowledge of high-level programming languages including Python, Ruby, and Java, with a foundation in HTML, CSS, and JavaScript for web development tasks.
- Familiar with C++ and SQL for database and systems-related tasks.

Frameworks and Libraries:

- Exposure to web development frameworks such as Ruby on Rails, with an understanding of Node.js and React.js for front-end development projects.

Software & Tools:

- Comfortable with Office 365 Suite for project management and documentation.
- Experience with Adobe Lightroom for photo editing and Matlab for data analysis tasks.
- Handling of command-line operations for system navigation and task execution.

Design & Prototyping:

- Introductory experience with Figma for UI/UX design concepts and prototyping.

Emerging Technologies:

- Curiosity-driven exploration of AI prompting and engagement with machine learning principles.

PROFESSIONAL EXPERIENCE

Globalworth

Tech Implementation Specialist | October 2023 - March 2024

- Managed the implementation of a building application, a replacement for access cards.
- Oversaw device installation coordination, customer support, and UX/UI improvement suggestions.
- Contributed to various stages of project development, ensuring effective problem-solving and user satisfaction.

Dronely

Unmanned Vessel Instructor | June 2021 - September 2023

- Conducted training sessions on drone operations, demonstrating both technical proficiency and instructional skills.

Barista / Bartender

Various Locations | June 2019 - August 2021

- Gained valuable customer service experience working in fast-paced environments, honing interpersonal and communication skills.

EDUCATION

Bachelor of Science in Computer Science

WSB Merito, Warsaw, Poland | October 2021 - Present

- Focused coursework on network security, defensive strategies, and digital forensics.
- Engaged in practical projects that emphasized secure coding practices and cybercrime investigation techniques.

Bachelor of Arts in Psychology

KUL, Lublin, Poland | October 2020 - October 2021

- Gained valuable insights into human-computer interaction, contributing to a more intuitive design in technology solutions.
- Honed analytical and research skills, aiding in systematic problem-solving and algorithmic thinking in tech projects.
